

BARKAN'S ONLINE VOTING PLATFORM

★ IMPORTANT INFORMATION & TIPS ★

PRICING & SUBSCRIPTION

- **One-time Setup Fee: \$500**
- **Monthly subscription: \$100**
(billed on an annual basis)
- **Two-year subscription option:**
The \$500 setup fee may be waived if the Board commits to a two-year term.

The platform must be purchased for the full year, even if used for one election or a single month.

Board Tip: This tool can be used year-round for elections, surveys, polls, and other voting needs!

ACCESS & EASE OF USE

- **Fully integrated into WebAxis,** accessible through the "Online Voting" tab.
- **Paper ballots are supported,** and can be manually entered into the system.

Homeowners do not need to create a separate account or manage additional login credentials. Once logged into WebAxis, owners simply click "Vote" and proceed after acknowledging a brief first-time disclaimer.

Board Tip: For owners not registered in WebAxis, invitations can be sent via direct email link to the voting site.

SECURITY & INTEGRITY

- **The system enforces one vote per unit**
- **All votes are counted according to the beneficial interest of each unit,** when applicable.

If an electronic vote is cast, no additional electronic or paper votes can be submitted for that unit.

Once one resident or spouse votes, the system automatically locks out all other voters associated with that unit.

REPORTING & RESULTS

- **Election Reporting includes**
 - **Quorum Tracking**
 - **Voting Percentages**
 - **Final Certified Results**

This online voting method ensures transparency, accurate recordkeeping, and documentation.

At the end of the day, the goal is acquiring comprehensive community feedback through genuine, unit-level participation .
